## SUMMARY

self-taught Full Stack Developer with a specialization in the MERN stack. I possess a strong understanding of the latest technologies and am passionate about building scalable web applications. I have designed user interfaces using Figma and utilized frameworks like Next.js to optimize website performance. I have excellent communication skills and enjoy working collaboratively with a team to deliver high-quality projects.

## PROJECTS

### cartcastle

📅 2023 📍 india  
🌐 <https://cartcastle.vercel.app/>

e-commerce

- Integrated JS Cookie to save cart items, allowing users to retain their selected products.
- Utilized MongoDB Atlas as the database to store user data and product information.
- Utilized React Context for efficient state management within the application.
- Integrated PayPal as the payment gateway to facilitate secure and convenient transactions.
- Published the project on GitHub for version control and collaboration.
- Deployed the web application on Vercel for easy accessibility and scalability.

### Netflix-clone

📅 2022 📍 india  
🌐 <https://muhammedsavadt.github.io/netflix-clone-app/>

movie streaming web app

- Utilized THEMOVIE API to fetch movie and TV show data, enabling users to browse and discover a wide range of content.
- The project demonstrates the ability to utilize external APIs, leverage React's component-based architecture, and showcase proficiency in web development using modern technologies.

### Olx-clone

📅 2022 📍 india  
🌐 <https://muhammedsavadt.github.io/olx-clone-app/>

classifieds platform web app

- Utilized Firebase as the backend to handle user authentication, including OTP verification and email validation, ensuring secure and reliable user registration and login processes.
- Implemented the ability for users to upload product photos and details, allowing them to easily list and showcase their items for sale.
- The project showcases proficiency in React development, Firebase integration, user authentication, and the ability to build a functional and intuitive web application similar to OLX, focusing on the buying and selling of products.

## SKILLS

### UI/UX

**FIGMA**

### CLIENT -SIDE

**HTML CSS JS REACT**

**NEXT TAILWIND TYPESCRIPT**

**MATERIAL UI BOOTSTRAP SASS**

**REDUX**

### SERVER - SIDE

**NODE JS EXPRESS MONGO DB**

**FIREBASE**

### PROGRAMMING LANGUAGE

**C JAVA PYTHON**

### DEVELOPMENT & OPERATIONS

**GIT GITHUB**

### ALSO USED

**POSTMAN JWT**

### INTEGRATION

**PAYPAL FIREBASE VERIFICATIONS**

**NODE MAILER**

## EDUCATION

### BTTM

**university of calicut**
